

Pursuing Complex and Innovative Facilities Solutions Through OTAs

Moderator: Jonathan Petry, AIA, LEED AP BD+C, OSD

Speakers:

- Stephanie Kline Army
- Timothy Sullivan, Ph.D., P.E. Air Force
- Karthik Bharat Navy
- Sam Valencia Defense Innovation Unit (DIU)

May 15, 2024, 10:30 a.m.

MODERATOR

Jonathan Petry
OSD
Architect

Fun Facts

- Team: Kansas City Current
- Vacation Spot: Philmont, NM
- Did you Know: You travel ~19 million km a day with respect to the center of the Milky Way.
- Hobbies: Backpacking, Cycling, Reading, and Lego

MAY 14-16, 2024
ORLANDO, FL

OPERATION:
COLLABORATION

SAME SAMEJETC.ORG

SPEAKER

Stephanie Kline

Army

Program Manager, Sustainability
and Resiliency

Fun Facts

- Team: Washington Nationals
- Vacation Spot: Jackson Hole, WY
- Did you Know: I adopt senior dogs
- Hobbies: Impressing strangers at conferences with my fun facts

MAY 14-16, 2024
ORLANDO, FL

OPERATION:
COLLABORATION

SAME SAMEJETC.ORG

SPEAKER

Tim Sullivan
AFCEC
Interim Director, Facilities
Engineering

Fun Facts

- Team: Cal Golden Bears
- Vacation Spots: Staycations
- Did you Know I am an avid baker
- Hobbies: Football road trips; cooking; swimming

MAY 14-16, 2024
ORLANDO, FL

OPERATION:
COLLABORATION

SAME SAMEJETC.ORG

SPEAKER

Karthik Bharat
NAVFAC
MILCON Program Director
Lead for Sustainable Buildings

Fun Facts

- Team: Team Caitlin Clark
- Vacation Spot: Anywhere sunny next to water
- Did you Know: All ideas, whether good, bad, or ugly, contribute to the innovation process.
- Hobbies: Golf, Learning Emerging Science & Technology Dev.

MAY 14-16, 2024
ORLANDO, FL

OPERATION:

Net Zero Goals and Challenges

Net-zero Emissions Buildings

- Design and construct to net-zero emissions as defined by the Federal BPS

Passive Design

- Optimize passive performance of buildings to use ambient energy sources

Electrification of Standard Building Operations

- Design and construct for full electrification of standard building operations

Energy Efficiency

- Design the building to reduce 30% energy from ASHRAE 90.1-2022 baseline

Sustainable Materials and Products

- Evaluate the cradle-to-grave environmental impacts of design decisions

100% Carbon
Pollution-Free
Electricity by
2030, including
50% on a 24/7
basis

100% Zero-
Emission
Vehicle
Acquisitions by
2035, including
100% light-duty
acquisitions by
2027

Net-Zero

Impact of Integrated Project Delivery

FAR-BASED PROTOTYPING OR DIU

Buy what you can, build what you must

 Chart adapted from: "Future Foundry: A New Strategic Approach to Military-Technical Advantage," Center for a New American Security (December 2016)

Accelerating Commercial Technology for National Security |

DIU's UNIQUE PROJECT LIFECYCLE - FAST & COMPETITIVE

Problem Curation & Diligence	<ul style="list-style-type: none"> • Receive, understand, and evaluate DoD partner problem • Confirm commercial market exists to address problem and conduct outreach • Build a coalition of US gov't partners that have shared interests in this problem 	
Commercial Solutions Opening (CSO)	Phase 1 <ul style="list-style-type: none"> • Solicit digital proposals in response to a problem statement 	~10 business days
	Phase 2 <ul style="list-style-type: none"> • Evaluate proposals and invite a short list of bidders to pitch 	60-90 days to contract award (goal)
	Phase 3 <ul style="list-style-type: none"> • Select contract awardee/s and negotiate prototype agreement 	
Prototyping	<ul style="list-style-type: none"> • Execute prototype project (OTA not FAR) 	12-24 months (36 for MILCON)
Transition	<ul style="list-style-type: none"> • Vendor Benefit: Award "Success Memo" to successful performers that allow them to sell their product to anyone in the US Gov't without re-competing • USG Gov't Benefit: Deliver and scale solution to transition partner/s 	

Accelerating Commercial Technology for National Security

Army Projects

FY24 VOLAR Barracks

Fort Campbell, KY

Scope: 44,106 GSF

Execution Agent: DIU

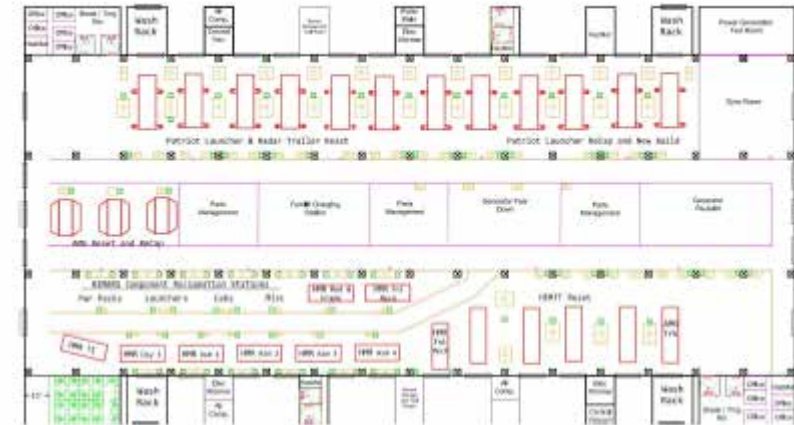

FY25 Component Rebuild Shop

Letterkenny Army Depot, PA

Scope: 115,630 GSF

Execution Agent: USACE

Navy Projects

FY24 CDC

Little Creek, VA

Scope: 40,074 GSF

Execution Agent: DIU

Notional building

FY25 F-35 Sustainment Facility

Cherry Point, NC

Scope: 248,000 GSF

Execution Agent: NAVFAC

FIRST FLOOR PLAN "MUSE" 02.23.2024

Air Force Projects

FY24 Child Development Center

Hanscom AFB, MA

Scope: 36,770 ft²; 262 children

Execution Agent: AFCEC

FY25 Medical Education and Training Complex

JBSA-Lackland, TX

Scope: 1,200 beds

Execution Agent: USACE

What have we learned so far?

Army

- Projects are living labs for newest policies
- Training and education are key to ensure sustainability elements remain from design to occupancy

Air Force

- Looking for new technologies for Net Zero facilities
- Seeking new business practices for faster acquisition
- Early integration of design, construction, and operations teams is key to streamline communication

Navy

- The CSO process delivers the promise of integrated project delivery – where collaboration begins at RFP development. Earlier than ECI/IDAC.
- Incentives seems to be aligned for this pilot to build a trusted environment between the government and contractor to achieve the project objectives. Time will tell.
- The framework to scale this approach is not clear. If we were to scale this early integrated project delivery beyond IDAC/ECI approach, we would like some feedback on the contracting framework that would work for the DoD.

Looking Forward

Evolution of the Military Construction process.

- Looking for technical solutions on codes/criteria but also on the process overall and better partnerships,
- Meeting requirements within resource and process constraints
- More ECI / IDAC – more innovation earlier in the planning and design process.

Greater transparency with industry

- Share equity, risk, and rewards with all parties
- Enhance outcomes through greater industry diversity
- Openly collaborate, and incentivize contracts in accordance with the scale of efforts

More Opportunities

- More prototypes through the CSO process.
- More innovative ideas, especially for net zero buildings
- More solutions at the scale necessary to enhance mission resilience

[PSAME_NATIONAL](https://twitter.com/PSAME_NATIONAL) | [#SAMEJETC24](https://twitter.com/SAMEJETC24)

["SOCIETY OF AMERICAN MILITARY ENGINEERS"](https://www.linkedin.com/company/society-of-american-military-engineers)

Key Takeaways

- DOD is exploring novel technologies and streamlined processes for Military Construction
- OTA is a new acquisition strategy (to those of us working on the built environment)
- We intend to apply lessons learned to improve “traditional” construction projects/processes
